

Art & Apparatus

– a meeting between art and technology

Art exhibition
focusing on
technology

International art exhibition at Kulturcentrum Ronneby, Sweden, reflecting a meeting between art and technology. 16 Juny – 2 September 2012.

The starting point for the exhibition Art & Apparatus is a workshop series on Machine Art Design/MAD Studio in Karlshamn and the Swedish Waterjet Lab in Ronneby. During the workshops, which started in the fall and winter of 2011–2012, twelve artists from five Baltic Sea countries experimented with water-jet technology and 3D modeling.

The exhibition includes the objects, sketches and models that the artists developed during the workshops. Also included are works from artists who have previously made use of technical equipment and digital media in their practice. Their works include video games, robotics, internet pornography and sonar.

Art & Apparatus is part of the project Art Line, an international cultural exchange between five countries in the Southern Baltic region; Poland, Germany, Lithuania, Russia and Sweden.

Art Line

Art Line is an international art project investigating and challenging the concept of public space. The main purpose is to create a co-operative platform for art and academia around the Baltic Sea. The platform will strengthen the institutions, create opportunities for artists, and interact with people in public space. The project period is 2011–2013.
